Indian Coffee, distinctive and delicious, gets its special aroma from the rich soil, climate and culture of India.

Nurtured on the shaded slopes of the Western Ghats with its spurs extending eastwards, Indian Coffee is grown under ecological conditions ideal for the growth of the finest coffees.

India's production of coffee for the season 1984-85 is estimated at around 1,70,000 tonnes. Coffee in India covers 2,26,848 hectares and accounts for 1,08,138 estates. Of this 1,05,848 are holdings below ten hectares, while 2,290 are holdings above ten hectares. Together these estates employ 3,44,505 daily workers.

The Coffee Board works for the growth and development of the Indian Coffee Industry. The Central Coffee Research Institute which is located in Balehonnur of the Chikmagalur District of Karnataka State has helped considerably in the scientific growth of Coffee plantations in India.

Coffee that is grown has to be processed or cured. There are 38 Coffee curing works in the country. A whole range of operations contribute to the quality of Indian Coffee. Careful picking of the coffee fruits, scientific processing, curing done to set standards and quality assessment, lead to the export of only the best coffee beans.

Coffee export earnings during 1983-84 were to the tune of Rs. 175.05 crores.

Indian coffee is becoming increasingly popular and recently an agreement was signed for the export of 25,000 tonnes of Indian coffee to Russia out of the 1984-85 crop with an option to export another 10,000 tonnes. Earlier, the Board entered into an agreement to export 10,550 tonnes of Indian Coffee to quota countries from the same season crop.

Today, the Coffee Board's efforts are aimed at increased production in traditional areas, while bringing non-traditional areas under coffee to ensure adequate supplies to cope with the increasing tempo of exports and internal consumption.

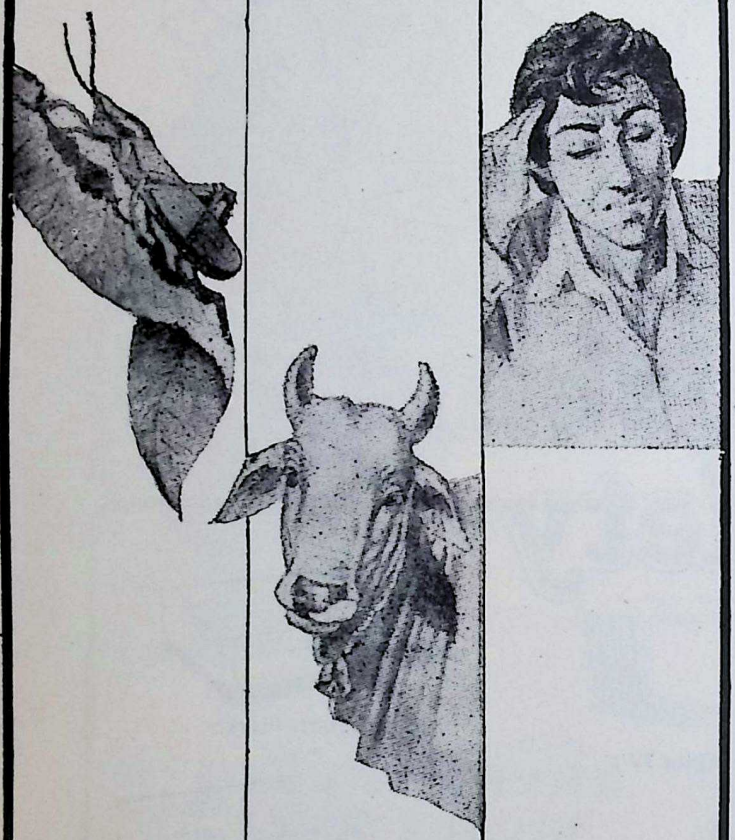
When crops are being destroyed...

when danger threatens animals...

when illness dissolves happiness...



who constantly works to protect?

HOECHST with the most advanced resources and knowhow.

Over 28 years, Hoechst in India has met a host of challenges — in crop protection, animal health, human illness.

Hoechst agrochemicals today stand guard over the country's crops. They are friends of the Indian farmer who depends on them.

To protect cattle against the dread Foot-and-Mouth Disease, Hoechst makes a vaccine which farmers and veterinarians trust. And Hoechst manufactures quality products for other animal ailments.

Hoechst's range of internationally-acclaimed medicines is respected by doctors, patients and chemists. All over the country.

To strengthen the hands of doctors, Hoechst now makes biologicals and diagnostic reagents — products which help doctors prescribe more accurate treatment.

Visual inspection of medicines.

And Hoechst is the largest exporter of pharmaceuticals in India.

Behind all Hoechst activity are two moving forces: Hoechst's faith in research and Hoechst's commitment to quality.

This is why Hoechst products are among the world's most advanced.

PREFACE

INDIA WHO'S WHO is intended primarily to serve the needs of the public at home and abroad for an authoritative source of basic biographical information about India's leading personalities who by virtue of their position and achievements have proved to be of significant value in their respective fields.

India Who's Who is today an accepted source of information and is widely referred to by all concerned. It is arranged professionwise and contains some 4000 biographies of people prominent in all walks of life, including Government, politics, civil service, business and finance, education, art, entertainment and sports, law and trade union. Only individuals active in their professions have been listed. The index catalogues all.

Each entry is updated annually. A copy is sent to the person concerned for revision and changes are incorporated accordingly. Nevertheless, many entries are not confirmed, may be because of change in addresses of the individuals concerned. An asterisk after a biography indicates repetition of the old entry for lack of latest information. Entries not confirmed for three consecutive years have been dropped. Some 300 new entries have been included this year.

Every year nearly 800 fresh bio-data forms are posted to individuals for selecting new entries. On receipt, the new bio-data forms are sent to prominent people in the respective fields for their opinion. Thereafter, our Editorial Board makes the final selection.

For easy reference, this annual publication is divided into seven main sections, each with allied professions grouped under it. Changes received or noticed later have been grouped separately as "Occurrences During Printing" which precedes the main text.

We would welcome comments and suggestions from our readers for improving the content, range and quality of the publication. While every care is taken to ensure accuracy, neither the publisher nor the printer is liable for any loss incurred through misprint or other circumstances.

This picture of Laxmi is from the Glaxo audio-visual "Let My Child See" on Xerophthalmia.

Glaxo in its contribution to disease prevention has especially devised audio-visual productions (slide-sound presentations) for public health education in urban slums and villages. The diseases covered are TB, Xerophthalmia (blinding malnutrition), home remedies for diarrhoeas and fevers, immunisation and nutrition.

The Ministry of Health and Family Welfare of the Government of India in its Statement on National Health Policy emphasizes that there will be only marginal results in health programmes "unless nation-wide strategies are launched to provide health information in easily understandable form, to motivate the development of an attitude for healthy living".

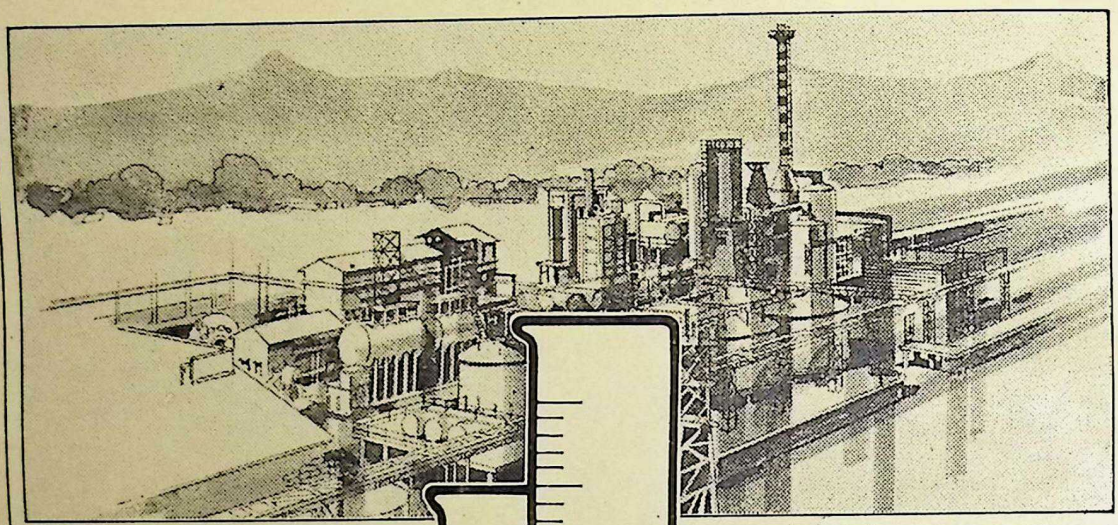
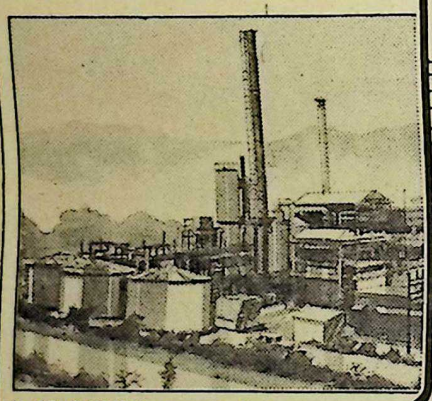
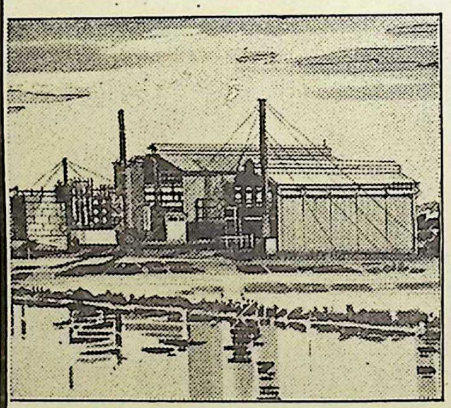
Progress at every stage







In 1919 DMCC set up its first Sulphuric Acid plant in Ambernath, Maharashtra.

Ever since, we have been expanding our horizons and growing in the world of chemicals.

Ours being industrial chemicals, they are chiefly used in the manufacture of paper, rubber, pharmaceuticals, sugar, textiles, dyes, paints, cosmetics, detergents, metals and also for water purification and agriculture.

Though you seldom see them, DMCC chemicals play a part in the manufacture of almost everything you use.

Today DMCC is a reputed name in industrial chemicals, and is poised for greater achievements-because we have always believed in progress at every stage.

If I may make some modest claims about the Swadeshi way of doing things...

utterly betterly Amul

To you Amul means premium products. Yes, they improve the quality of life for you.

To the producers—nearly 10 lakh farmers—Amul means the co-operative way of working together, which has improved the quality of life for them.

View from the top.

He'd thought the whole world was taller than he. Until suddenly Daddy swooped down, hoisted him up, and showed him the dizzying viewpoint of the grown-ups.

One day that's where he'll belong. While standing on his own feet.

Make sure you get him ready for that perspective. Make sure he doesn't totter and cry for help.

Make sure with life insurance planning. LIC's policies – including special schemes for children – help you keep sight of the burdens and responsibilities that will spring into his sight. Education. Start in life. Career.

They're your responsibilities now, for a while. And ours. Why don't we get together?

Undeniably! BEL's role in developing radio communication and telecasting enabled India to achieve technological self-reliance. Its transmitters, tape recorders, cameras and other related studio equipment send out India's message through the length and breadth of the country. Building for India, a contemporary communication network with an effective reach.

And the story doesn't end there. BEL is also tuned in to other diverse manufacturing activities like fire control systems, radars, defence communication systems, weather monitoring radars, vacuum tubes, semiconductors, ICs and crystals among others.

Today, BEL's turnover is Rs. 142 crores. Further investment on new projects is planned. Its record—profits since 1960, a steady 12% dividend since 1970, orders worth over Rs. 3650 million—owes much to its 18,000 dedicated, goal-oriented people.

BEL's latest expansion project is the black & white TV glass bulb unit at Taloja in Maharashtra, which is designed to make India self-reliant in TV tube technology. A step that has made BEL equipped more than adequately, to confront the challenges of the future.

**Only Forhan's has
an exclusive astringent that strengthens gums.
And teeth last longer, when your
gums are stronger.**

Dr. R. J. Forhan, an eminent
American dentist put an exclusive
astringent into his toothpaste.
An ingredient that acts directly on
the gums, and actually tightens them,
making them strong, and
giving them a better grip on your teeth.
Thus giving teeth a firmer foundation,
and a longer life.

PACHMARHI

THE HILL RESORT OF FLOWERS AND FALLS.

Far from the madding crowd—to peace and serenity.

Where nature is still nature—Pure, unspoiled

Out of this world. The crisp sunshine and the air spiked with the scent of wild flowers.

In the heart of the hills are cascades with magical names—Bee fall, Duchess fall, Little fall.

Visit Pachmarhi's sixty-four sites, view points, caves, temples, hill-tops, water falls, swimming pools and cool retiring nooks or simply walk through dappled meadow and glen to doctor's delight or do nothing at all and do it beautifully on the undiscovered hills of Pachmarhi.

CONGRESS (I) MINISTRY IN NAGALAND : MARCH TOWARDS PEACE AND PROSPERITY

In November 1982, the people of Nagaland voted Congress (I) Party into power. When the Congress (I) Ministry assumed office, it made a solemn tryst with the people to lead them to a long march towards peace and prosperity. The Ministry also pledged to serve the people but never to be masters over them.

Nagaland is now undergoing profound changes. The Nagaland of May 1984 is vastly different from the Nagaland of May 1982.

The year 1984-85 will be remembered for:—

1. A special programme has been taken up for the unemployed educated youths with an outlay of 50 lakhs.
2. Provision of Water Supply to 80 villages thus bringing a total of 625 villages with regular water supply in the State.
3. 52 villages were provided electricity which add up to a total of 560 electrified villages in the State.
4. Construction of 251 K.M. of New Roads.
5. Establishment of a separate Directorate for Technical and Higher Education.
6. Establishment of 200 industrial units out of 715 licenses issued.
7. Opening of a series of fair price shops for speedy distribution of essential commodities.
8. Under afforestation programme, 700 hectares of land brought under new plantation.
9. Reaching of an Agreement with the state of Assam towards early solution of Assam-Nagaland Border issues.

Issued by Directorate of Information & Publicity, Nagaland, Kohima.

परिणामों से जांची जायेंगी उपलब्धियां

आज तरक्की के लिए आपसी ईर्ष्या और द्वेश की नहीं रचनात्मक दौड़ की जरूरत है। काम और परिणाम पर पूरी तरह विचार की जरूरत है। सुविचारित लक्ष्य और कार्य प्रणाली पर निर्भर है राष्ट्र की प्रगति और आत्म निर्भरता।

आजादी का मतलब है अनुशासनबद्ध विकास। त्याग, प्रेम और भाईचारा। हम एक नये युग में प्रवेश कर रहे हैं। आत्म निरीक्षण की आज सबसे ज्यादा जरूरत है। समाज में बराबरी और समृद्धि ही हमारा लक्ष्य है। नयी सुबह का उजाला हर घर, हर द्वार और कोने तक पहुंचाना है।

सबके सहयोग से बनना है एक अनोखा निर्माणात्मक और रचनात्मक माहौल। परिणामों से जांची जायेंगी उपलब्धियां। शासन कटिबद्ध समस्याओं के हल के लिए और जनाकांक्षाओं को मूर्त करने के लिए।

HARYANA: TOWARDS A MORE PROSPEROUS FUTURE

Haryana through its many faceted development has emerged as a trend-setter in the last few years. We have marched forward meeting the challenges of poverty, illiteracy and unemployment. Our achievements in various sectors such as Agriculture, Industry, Communications, Science and Technology have been stupendous. Our sharp focus on the poorer and more deprived sections of society has helped them join the mainstream of national resurgence. A strong and efficient administration has ensured peace and progress. The progress will continue.

* Haryana has achieved 70 lakh tonnes in foodgrain production as against 26 lakh tonnes in 1966.
* Irrigation potential has risen to 37 lakh hectares as compared to 12.93 lakh hectares in 1966.
* All Harijan bastis have been illuminated and 44,825 Harijan homes have received one point connections at concessional rates. Streets in 4,100 villages have also been illuminated.
* Small scale industrial units have zoomed to 53,000 as against 4,500 in 1966. 19,439 rural units employ 53,247 persons of which 50% belong to weaker sections.
* Annual industrial exports have risen from Rs. 4.5 crore in 1966 to Rs. 200 crore as a result of rapid industrialization.
* Haryana has been consecutively bagging family welfare awards on account of its excellent overall performance during 1982-83 and 1983-84.
* 3,380 villages out of a total of 4,690 problem ones have been provided with safe drinking water. We propose to cover all the scarcity villages by 1987.
* All villages are connected by metalled roads. The length of metalled roads has risen to 20,000 kms. from 5,100 kms. in 1966, representing a four-fold increase.
* Ten crore trees were planted last year to bring more area under forest cover and we propose to plant an even number during this year.

We shall modernise and yet preserve our rich cultural heritage. Let us resolve to work as a united people and safeguard the national unity and integrity under the bold and dynamic leadership of our Prime Minister, Shri Rajiv Gandhi so that we march towards a more prosperous tomorrow.

Chief Minister, Haryana.

The lone Spice that has stood the 'TASTE' of time—INDIAN CARDAMOM—fondly called the "Queen of Spices".

Indian Cardamom—There is nothing like it.
It is Mother Nature's Special gift to Mankind.

MODERNISE AND PROSPER .... WITH SOFT LOANS FROM GSFC

You know modernisation is a must for the survival of any unit to adapt to the fast changing environment and technological development. If you have a modernisation programme for your unit for improvement in productivity, product quality, technology or competitiveness and reduction in cost for betterment of profits, GSFC has a soft loan scheme designed for you with several relaxations:

* Low interest rate — a mere 11.5%
* Lower promoters' contribution.
* Flexible debt-equity ratio and margin.
* Simplified loan application form.

Before you go in for the modernisation programme, make sure your unit is in existence and the machinery is in use for atleast 5 years. The benefits of this scheme are available to units eligible for term finance from the Corporation.

THE TOBACCO SCENE

Tobacco in India is grown mainly in the States of Andhra Pradesh and Karnataka. In Andhra Pradesh flue-cured virginia tobacco is grown in heavy black soils and light soils. In Karnataka it is grown on the light soils in the transitional belt.

Black soil production accounts for nearly 60 per cent of the total production and is grown as post-monsoon crop. Light soil production contributes for about 48 per cent of the total. In Andhra Pradesh it is grown under both irrigated as well as just at the end of South-West monsoon conditions. Karnataka light soil tobacco is grown under monsoon conditions. The production of unmanufactured tobacco in India was 454 million kgs. during 1978-'79 and about 450 million kgs. during 1983-'84. In the same period exports of unmanufactured tobacco have increased from 78 million kgs. in 1978-'79 valued at Rs. 111 crores to 90 million kgs. valued at Rs. 181 crores in 1983-'84.

Tobacco from India is exported to over 50 countries. The major markets for Indian tobacco are the USSR, The United Kingdom and other EEC countries. Japan, China, Bulgaria, Czechoslovakia, German Democratic Republic, Algeria, Iraq, Libya, South Yemen and Egypt are the other prominent buyers.

To usher in all round development of the tobacco industry, the Tobacco Board was established in 1976 under an Act of Parliament. Regulation of production in line with demand and evolving export promotion measures to maintain and improve the existing markets and developing new markets are some of the main functions of the Board. In 1983 the Tobacco Board conducted test auction of virginia tobacco in Karnataka. Tobacco Board successfully conducted auctions on 8 platforms in Karnataka in 1984 marketing season and sold 16.5 million kgs of VFC tobacco. In 1985, VFC tobacco through auction sale is introduced in Andhra Pradesh where 21 auction platforms are set up for this purpose. Marketing through auctions will better the growers' returns.

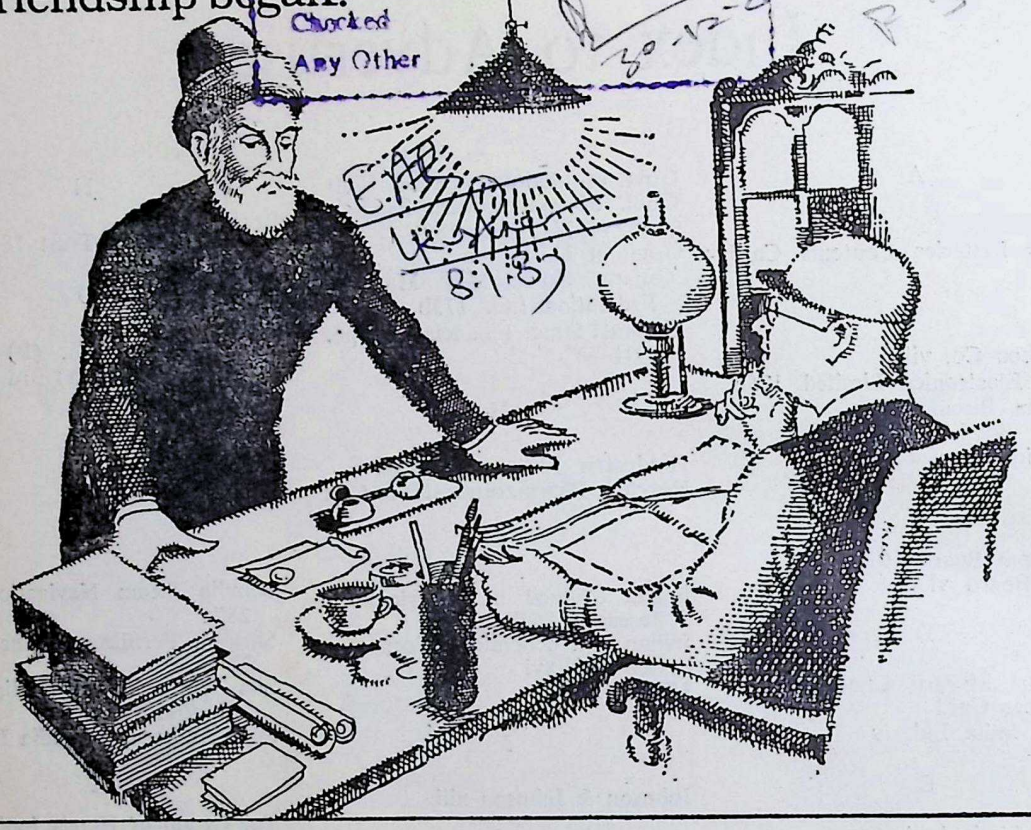
84 years ago, a friendship began.



Pittsburgh 1901. Jamsetji Nusserwanji Tata, our Founder, visited the USA in search of technical advice. He met Julian Kennedy, a renowned metallurgist, to whom he unfolded his plan to build India's first steel mill. Kennedy advised "a thorough scientific investigation of local conditions and raw materials" and recommended Charles Page Perin, an eminent engineering consultant, as the best person to undertake a preliminary survey.

New York 1901 (as recorded by Perin): "I was poring over some accounts in the office when the door opened and a stranger in strange garb entered. He walked in, leaned over my desk and looked at me for fully a minute in silence. Finally, he said in a deep voice, 'Are you Charles Page Perin?' I said yes.

"He stared at me again silently for a long time. Then slowly he said, 'I believe I have found the man I have been looking for. Julian Kennedy has written you that I am going to build a steel plant in India. I want you to come to India with me, to find suitable iron ore and coking coal and the necessary fluxes. I want you to take charge as my consulting engineer. Mr Kennedy will build the steel plant wherever you advise and I will foot the bill. Will you come to India with me?'

"I was dumbfounded, naturally. But you don't know what character and force radiated from Tata's face. And kindliness too. Well, I said, yes, I'd go. And I did."

Thus began India's industrial renaissance.

At Shriram, the focus is always on good performance, whether in the factory, field, office—or auditorium. Artistic talent is promoted as systematically as work talent.

Employees of Shriram Fertilisers & Chemicals, at Kota and elsewhere, are given every opportunity to develop their talents—in music, dance, drama—and perform at their best.

Our Shriram Kala Mandir at Kota is equipped with the latest lighting and acoustics technology. And our Shriram Ramlila is a brilliant spectacle which attracts thousands from all over Kota and the neighbouring areas.
